

Seahorse Tutorial by Donna

10) Keep heating and stretching until you like the size.

11) Remove top puntty and punty up to the side of top lobe we are going to pull his snout.

12) Heat just the lobe and pull down and outward at the same time.

13) Remove punty from his snout. Now you have the basic shape.

14) Add color to top of his head for the top fin.

15) Add color to back for back fin.

16) Add colored dots to both sides for his side fins.

17) Heat the dot you applied for his fins till glowing and smash flat with marver.

18) Like so.
